

UT17

SUBMERSIBLE UTILITY PUMP

Portability and ease of use makes the Barnes UT17 ideal for a wide variety of utility water pumping applications, such as pumping out shallow pools, draining pool covers and other light wastewater needs. There is no need for special attachments for draining, as a 3/4" garden hose easily attaches to the vertical discharge connection. The UT17 is made of durable engineered thermoplastic material for long term, corrosion free life.

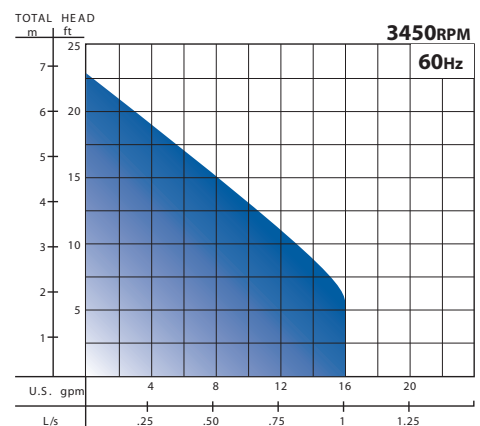

Barnes UT17 additional features:

- Portable with molded handle
- Fully submersible design
- 3/4" male outlet connection for use with standard garden hose
- 1/6 HP, 3450 RPM
- 15 foot power cord with molded 3-prong plug
- Can pump down to 1/8" from the floor surface
- Strainer prevents entry of solids and debris

Model	UT17
Voltage	120 V
RPM	3450
Max. GPM	14
Max. Head	23'
Cord Length	15'

Optional features:

- Can be used as an automatic pump with Piggy-back float

Removes water from any flat surface down to 1/8".
