

# BC-15 BC-20S

## CONDENSATE PUMPS

High water alarm switch internal.  
 BC-20S leads should be connected  
 to a class 2 voltage circuit (not to  
 exceed 30 volts).

\* The high water leads

Barnes Condensate pumps are general purpose residential and commercial pumps that remove condensate when gravity drains are not available. Thermal protection, automatic start and quiet operation are just a few of the features that make this pump the right selection for all your condensate removal needs!

Model	BC-15	BC-20S
Part Number	135782	135783
Voltage	115	115
HP	1/50	1/30
Max. Head (ft.)	15	20
Weight (lbs.)	4.5	5.0
Safety Switch	No	Yes
Max Flow (GPH)	85	110

### Features:

- High impact tank constructed with ABS material
- Three inlet openings
- 3/8" O.D. barbed discharge adapter with built-in check valve (installed on the pump)
- Removable check valve
- Stainless steel shaft
- Built-in safety switch (BC-20S only)
- 150°F maximum fluid temperature

### Applications:

- High efficiency furnaces
- AC equipment
- Ice machine
- Drinking fountains
- Dehumidifiers
